

Complimentary Water Testing

If there's any delay, it's you we pay!®

Why You Should Test Your Tap Water

Water is a basic human need, and access to clean water is crucial for every family - to drink, cook, bathe, brush, and wash.

- Tap water cannot always be trusted
- May contain chlorine, bacteria, lead, mercury, pesticides and waste particles

Advantages of Properly Filtered Water for the Health of Your Family

- Removes chlorine for a healthier drink
- Eliminates lead
- Saves on need and cost for untested bottled water
- Reduces risks of cancer and other health related water problems
- No water related gastrointestinal problems
- Fewer water quality related headaches
- Tastier food
